

# OBSERVATIONS FROM THE PEANUT GALLERY

---

Mark Prior

# What's less popular than IPv6?

- People from 89 organisations registered
  - Pruned out personal domains, using gmail, etc.
- 27 IPv6 accessible web sites (~30%)
  - 1 using ipv6.\$domain rather than [www.\\$domain](#)
  - 11 using HTTPS or HSTS
- 71 have SPF configured (~80%)
  - 22 are configured as a hard fail (~25%)
  - 1 has erroneously configured more than one record
  - 1 lacks an action so defaults to a no-op
- 4 zones signed using DNSSEC (~5%)
  - APNIC, Cloudflare, ICANN, and Vodafone Hutchinson
- Will add to [http://www.mrp.net/ipv6\\_survey](http://www.mrp.net/ipv6_survey) later
