# Vocus RPKI Implementation

Phil Mawson(level 2 text)

6<sup>th</sup> March 2022

**VOCUS**

# Design Decision

Multivendor (Cisco, Juniper, Arista, Nokia)

International (Australia, NZ, US & Asia)

Security Concerns

Centralised Management & Monitoring

What validator software to use

	IOS	XR	JUNOS
SSH	NO	YES	NO
TLS	NO	NO	NO
TCP	YES	YES	YES
TCP-MD5	NO	NO	NO
TCP-A0	NO	NO	NO
IPsec	NO	NO	NO

## Validator Software

NLNet Labs Routinator – Very community focussed

Join their RPKI Discord Server

RIPE RPKI Validator – EOL mid July 2021

Fort

OctoRPKI

BSDs open-rpki with GoRTR (now StayRTR)

4826 & 9443 Routers

rtr

Location 1: Sydney

Location 2: Melbourne

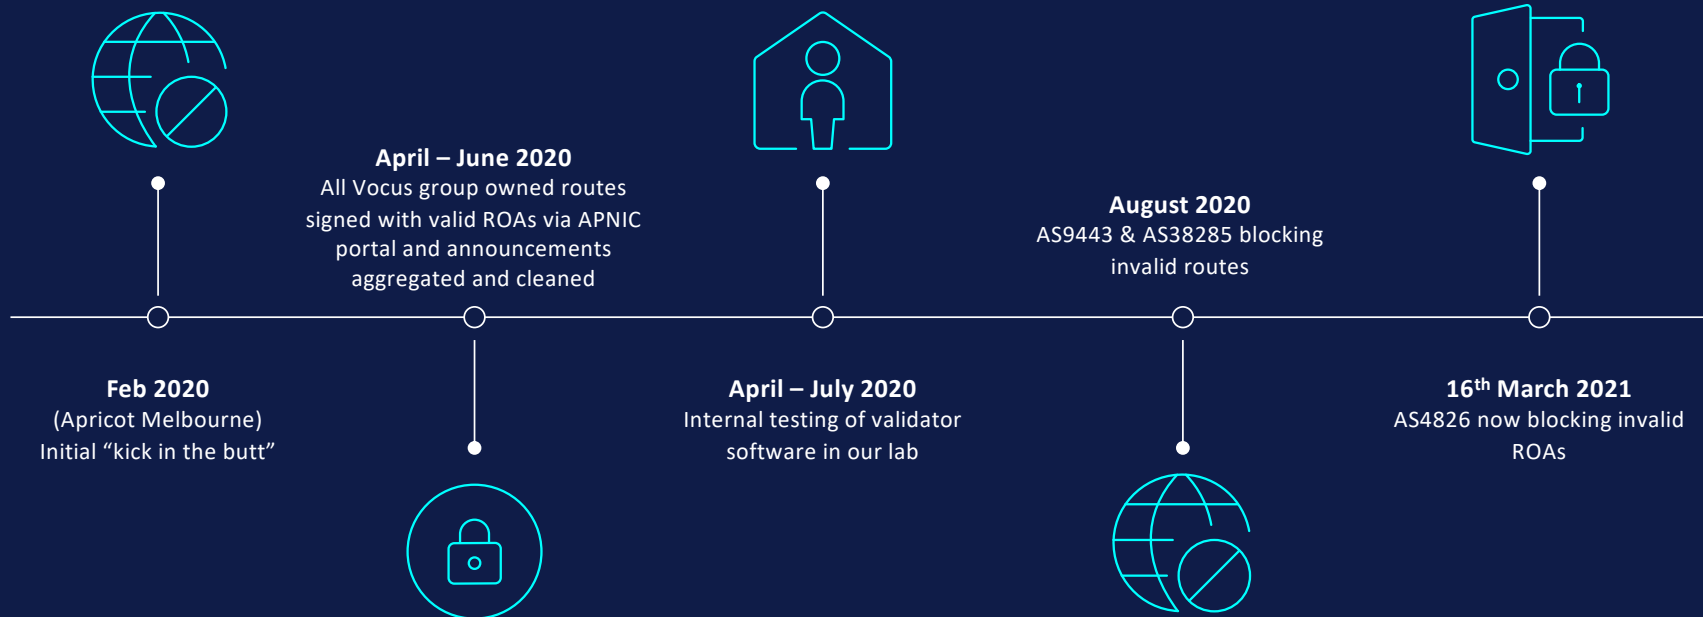

rsync/rrdp

# Timeline

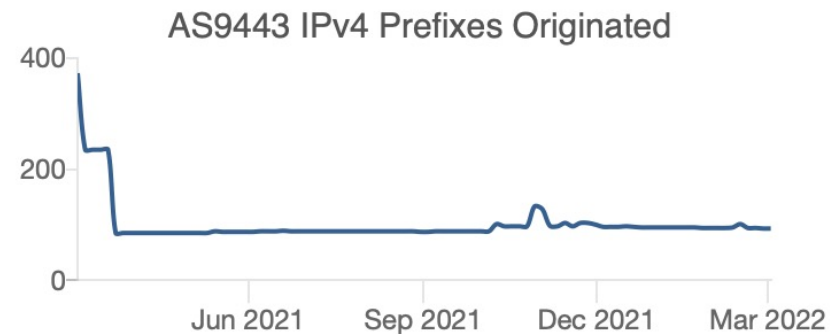

## Aggregation of routes and IRR Clean up

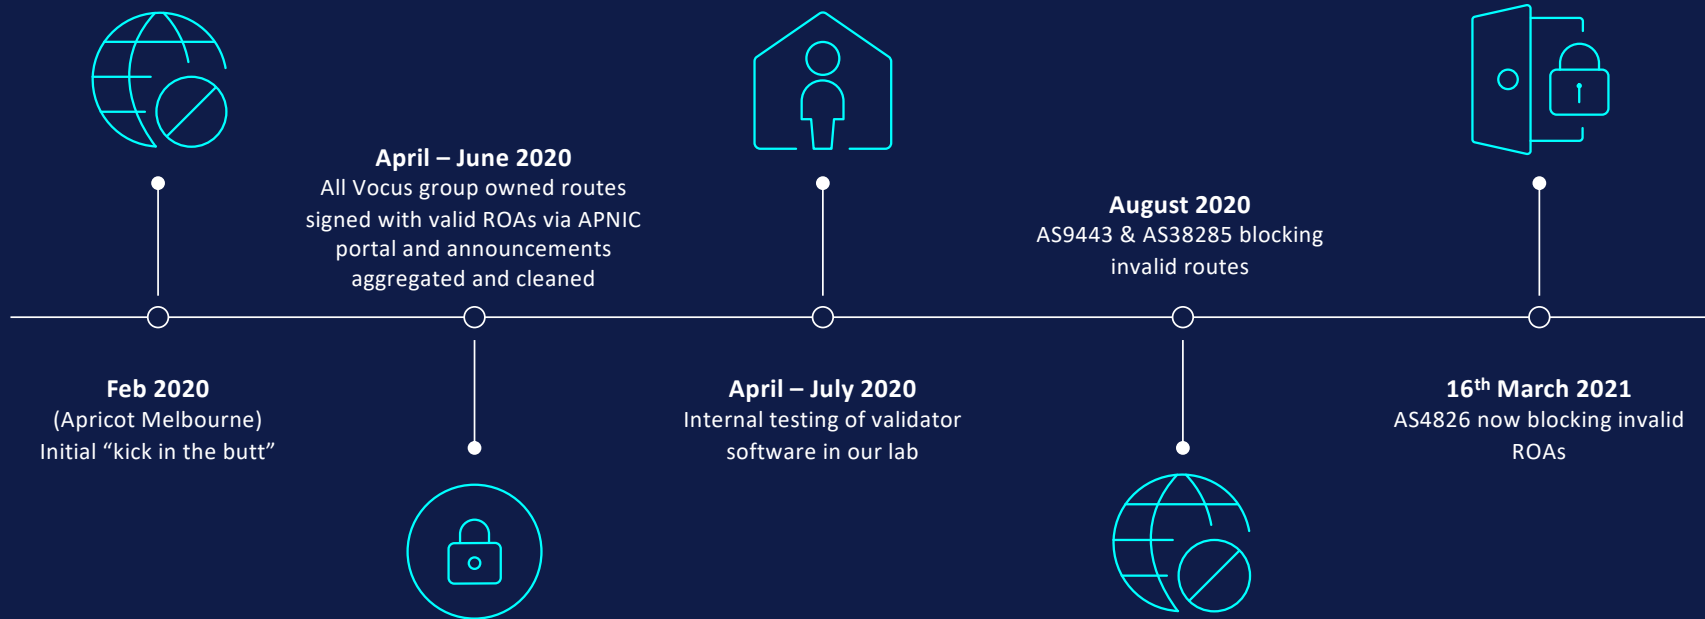

AS9443 routes were aggregated as highly as possible, we remove approx. 60% of the announced routes into global table.

Any Vocus Owned route now have their WHOIS object via APNIC and removed from many third party data sources (RADb, REACH, NNT, Level3). Single source of truth

Long term goal to remove all legacy entries in our RADb – Got any, [irr@vocus.com.au](mailto:irr@vocus.com.au)

# Timeline

# Lessons Learnt

OpenSource software can be EOL'd very quickly

- RIPE Dropped their validator support end of 2020
- Louis left Cloudflare, leaving GoRTR un-maintained. This was later forked to StayRTR

Java Sucks (Who didn't know this already)

- RIPE Validator UI was built on Java, often would crash and require process restart

Clean your IRRs

- APNIC make it very easy to create those objects in their portal.
- Trust a RIR over RADb

Customer notifications

- Get this right, and get it done early.

## Limitations Learnt

### Cisco

- Unable to set source address for validation session  
Bug CSCvg37740 and resolved in 6.7.1
- If session to validator server lost, cache may not be re-built locally  
Bug CSCvp82287 and resolved in a number of versions

### Juniper

- Only support clear text (no SSH unlike Cisco)  
Not resolution for this yet, is a feature request

# Monitoring

**BGP Alserter** APP 15:35

**rпки**

The route 202.43.86.0/24 announced by AS4826 is not RPKI valid. Valid ROAs: 202.43.86.0/24|AS45947|maxLength:24. Top 3 most used AS paths: [3356,4826], [8220,4826],[8758,6830,3257,4826].

**BGP Alserter** APP 15:57

**visibility**

The prefix 202.43.86.0/24 (CUSTOMER) has been withdrawn. It is no longer visible from 40 peers

The image features a dark blue background with several overlapping, wavy, semi-transparent shapes in shades of teal and light blue. These shapes have a fine, grid-like texture. In the center, the word "VOCUS" is written in a white, sans-serif font. The letter "O" is replaced by a cluster of eight small white dots arranged in a 2x4 grid.
